PROFESSIONAL SUMMARY

Enthusiastic engineering student with a strong foundation in programming, AI/ML concepts, and software development. A quick learner eager to apply technical skills, explore new technologies, and contribute to innovative projects while continuously developing professional and technical expertise.

EDUCATION

Dayananda Sagar College of Engineering, Bengaluru
Bachelor of Engineering — Electronics Engineering | 2023–2027 | CGPA: 8.3

EXPERIENCE

Python Development Intern | Infyntrek Systèmes • Jun 2026 – Aug 2026

- **Developed Sentinel**, a team-based real-time log anomaly detection project using Python, Pandas, and Scikit-learn.
- **Built an Isolation Forest** pipeline for log feature extraction, model training, anomaly scoring, and alert generation.
- Tested suspicious web-server patterns, including administrative-access attempts and injection-like requests.

PROJECTS

DocMind — Agentic RAG Research Assistant GitHub

Python · RAG · Sentence Transformers · FAISS · FastAPI · Streamlit · OpenRouter

- Built a document-grounded question-answering assistant using retrieval-augmented generation (RAG) to answer questions from uploaded PDF, DOCX, and TXT files.
- Implemented text chunking, Sentence Transformers embeddings, and FAISS semantic search to retrieve relevant passages for LLM-generated answers.
- Integrated OpenRouter with a FastAPI backend and Streamlit interface, returning source references and relevance scores with answers.

AI Career Copilot GitHub

Python · Flask · SQLAlchemy · TiDB Cloud · OpenRouter API

- Built an AI-powered career assistant that parses PDF and DOCX resumes, compares candidate skills against target job roles, and highlights matching and missing skills.
- Integrated structured LLM outputs to generate personalized learning roadmaps, interview questions, and project recommendations aligned with identified skill gaps.
- Implemented user authentication, resume-processing workflows, SQLAlchemy-based persistence, report history in TiDB Cloud, and a dashboard for reviewing previous analyses.

TECHNICAL SKILLS

Languages	Python, C++
AI / ML	Machine Learning, Retrieval-Augmented Generation (RAG), Isolation Forest, Anomaly Detection, Generative AI, LLM API Integration
Frameworks / Libraries	FastAPI, Flask, Scikit-learn, Pandas, NumPy, Streamlit
Databases / ORM	MySQL, TiDB Cloud, SQLAlchemy
Tools / Core	Git, GitHub, VS Code, Jupyter, DBMS, OOP, REST APIs

CERTIFICATIONS

- **Generative AI Camp — Certified** (Jul 2026): Covered Generative AI fundamentals, large language models, prompt engineering, AI workflows, and practical application development.
- **Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate** (Oct 2025): Demonstrated foundational knowledge of AI and machine-learning concepts, Generative AI, and Oracle Cloud Infrastructure services.
- **IIRS–ISRO — Geodata Processing using Python and Machine Learning** (Feb 2025): Worked with Python-based geospatial and raster data processing and introductory machine-learning classification techniques.
- **NPTEL — Database Management System** (8 weeks): Studied SQL, database design, normalization, transaction processing, and core database-management concepts.
